Guys, fyi

Not sure why Greg sent this to me (first time he has ever shared sampling data with me), maybe because I suggested the lab coordination call (that will take place at 9:30 am this morning). Really helpful to see though. Jack maybe we can just discuss at the 9 am EPA call? Not sure we should email out to the whole group until we hear if that is ok from National Guard.

Vik, Ed, Larry - any word on when our CDC website will be updated with the PPH screening value info?

Thank you, Lora

Ex. 6 - Personal Privacy Lora,

The result that was reported at 20 ppb on the finished water was an error. This is the sample I mentioned during Saturday's brief. See below message. All results have still been non-detect.

Thanks,  
Greg

Sir,

I'm not sure if you spoke with someone over the weekend, but that number should have been 2.04, which would be reported as a non-detect. I'm so sorry for the confusion.

Sincerely,

Ex. 6 - Personal Privacy

Hello,

Can you look at the body of your email below where the 00:00 sample for Finished MCHM is

20.4 ppb and then that sample is read as Non Detect on the actual pdf report. Could you let me know which is correct.

Thanks!  
Greg
